Joshua McNair

IFT301 Spring A 2019

Milestone 1

For my final project I will use HTML, CSS, and Javascript to design a website that connects

sponsors to people in need of clothes. The landing page will consist of an image, with a sidebar

containing hyperlinks to all relevant sub-pages within the website. Images, and videos, forms

and other visually appealing multimedia will be added to the site and will also implement a

clean and simple interface for the user.

Free Clothes

Our Charity was started because we believe that nobody should ever be denied the basic human right of having warm clothes to wear
